

Overview

THE OFFICE AS A LIVING AREA: IN THE NEW ECONOMY THE SUCCESS OF YOUR COMPANY DEPENDS PRIMARILY ON AN EFFICIENT FLOW OF INFORMATION

The way in which people communicate with one another is very critical for working together creatively. The working world of the office becomes a living area whose quality determines the success of the entire company.

Office work takes place at new locations and is not longer tied to fixed organisation forms. Offices are becoming temporary, fractal and mobile, non-territorial and even virtual. But the office still remains a place of orientation, identification and motivation. However, intelligent and flexible office concepts are not simply available „off the shelf.“ Depending on the company and corporate area, the working and process requirements for the office as a living area vary.

An international research team from Haworth therefore concentrates on spatial and product concepts that are timeless, unaffected by the future, cost-saving and easy to modify. We call this holistic approach Organic Workspace.

ORGANIC WORKSPACE STANDS FOR THE ABILITY

... to structure office worlds in a flexible, motivating and sustainable way that can be adapted quickly and easily at any time to meet the new requirements of organisations. Haworth develops concepts that are based on global knowledge, many years of experience and a uniform design approach. An understanding of design that offers product solutions that can be integrated and by which the change processes within the working and office world can be implemented more easily and quickly. For that reason we understand Organic Workspace to also be a continuous and dynamic process that requires innovative, integrable, adaptable and sustainable solutions that will also be convincing tomorrow. Haworth offers overall and complete solutions from one source: From high-quality furniture for management to communication solutions with a high level of technological benefit and modular space divider systems for creative and architectural interior design.

HIGHLY MOTIVATING
WORKSTATION SOLUTIONS
FOR ALL WHO WISH
TO REMAIN FLEXIBLE
AND SUCCESSFUL

The Audience Executive range delivers a modern take on executive furniture. The design is anchored in a contemporary style without sacrificing the functionality of technological integration. The executive table is a tribute to the traditional standalone desk with two pedestals. The hanging storage units conceal a projector, permitting impromptu or confidential meetings from the comfort of your office.

The executive a_con desk merges elegance with intelligence, presenting a distinguished table with excellent cable management and integrated technology. You can furnish your whole executive office with a_con. The full range features: a circular side table; a stand-alone lectern and storage space including drawer units that can act as a table leg (load bearing pedestals), sideboards, shelves and cupboards.

The simple design is equally capable of creating a single workstation, a team bench or a conference solution, and integrates as easily into tranquil managerial settings as busy offices. The Kiron desk offers a choice of leg styles and is available in fixed height or with either manual or motor driven height adjustment. The range includes accessories and personal storage solutions.

Kiron | Management & Office Systems

Areas of application:

Management, individual workstations, team workstations, bench workstations, call centres, meetings, meetings, conferences

www.haworth-europe.com

Epure range adapts to change in an easy flexible and sustainable way. The universal Diabolo milled head offers tool-less assembly. The structural worktop removes the need for excessive supporting framework while shared legs reduce the number of components and increase the available space under the desk. The range offers a variety of workstations, team benches, meeting and managerial solutions.

T_up | Management & Office Systems

T_up is a comprehensive and cost-effective desk system designed for easy assembly into numerous configurations. Its storage options transform a simple desk into an efficient and integrated workspace. The central beam design allows for a variety of legs, including height adjustable options, meaning T_up can scale from a single desk to a workstation bench or even meeting tables.

The Tibas desk system benefits from a clear design which allows integration into a wide range of office environments. It can easily be combined with other Haworth products to create the complete workstation. The desk top appears to float gently over the frame, and with extended solutions it is possible to share a single leg for two tops, saving space and cost. These solutions are ideal for long meeting and conference tables.

No sitting position is „the right one“ in the long term, only a constant change of posture and position can provide relaxation and promote good circulation of the blood. For these reasons occupational physicians recommend sit/stand workstations.

Requiring only a slightly greater investment than a workstation with a fixed or adjustable working height, with the TC600 the desk area can optimize various activities and the size of the person involved by pressing a button. The TC600USD also has special advantages when setting up Desk Sharing workstations. All that is needed is to press a button and the working area is adjusted to suit changing users.

You can work remotely with Eddy and Maria. As a meeting table, temporary workstation, or as an additional work area, Eddy and Maria make it possible to work sitting or standing and while sitting, alone or with colleagues. The Eddy table is easy to move thanks to its rollers and is quick and easy to adjust for height. Maria is the smaller version of Eddy and offers sufficient space for mobile working. The plain and unadorned working can be height adjusted and also the inclination angle can be adjusted and folded up. A bag holder on both tables is another way of ensuring tidiness.

The more intensively we work, the more important it is to have zones that provide an opportunity to withdraw for relaxation and regeneration. Haworth has developed together with the designer Marie Virginie Berbet the „CalmSpace,” a rest capsule that can be set up quickly and used at once in the office. The person who is seeking a rest steps through the curtain that has an acoustic blocking effect and lies down on a fabric-covered mattress. The user can select the duration for a power nap - from 10 to 20 minutes - with a preset sound and light cycle that will help him or her to go to sleep and wake up easily. The CalmSpace allows individual persons to revitalise themselves, to relax, and to recharge their batteries. The power nap improves the sense of well-being and increases productivity at work.

Open-plan row seating

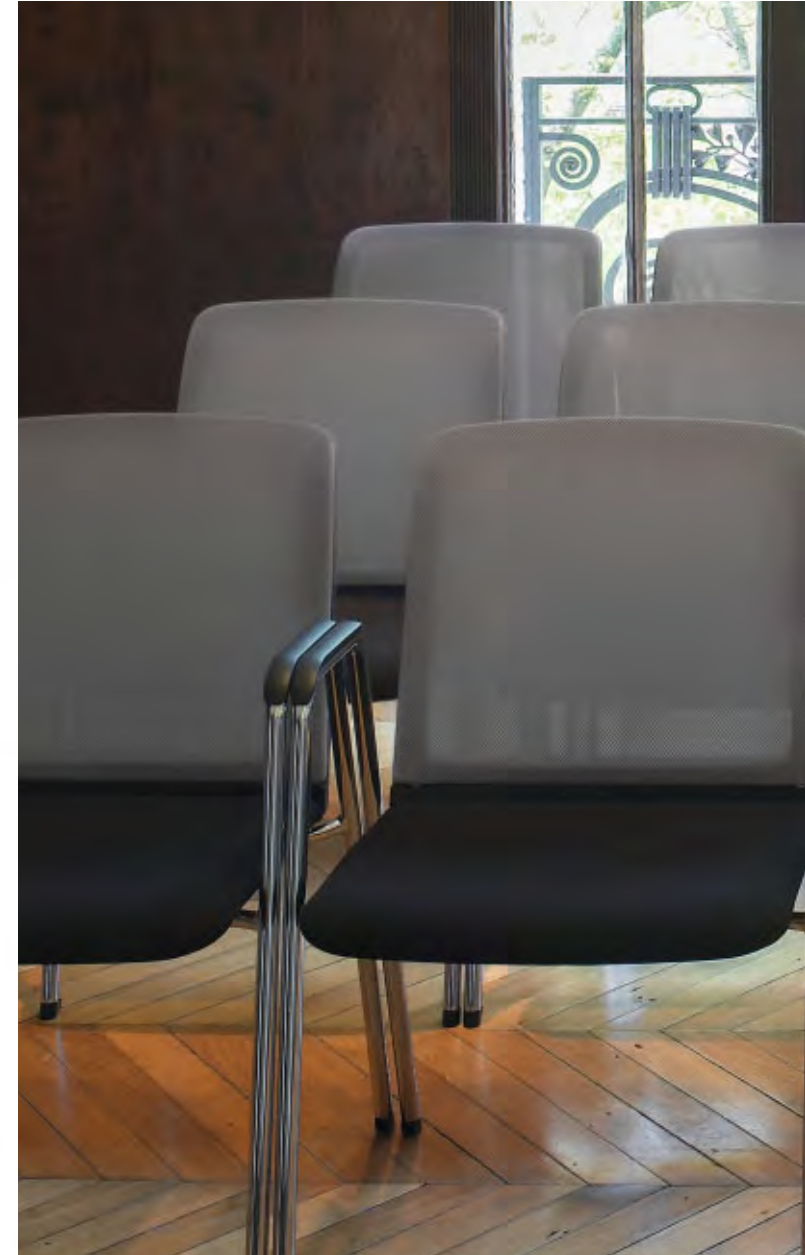

SEATING CONCEPTS
SO THAT EVERYONE
IS IN THE FRONT ROW
ALL THE TIME

The Comforto 29 sets new standards in its price class. Not only because of its excellent design but also and above all with regard to its functional and ergonomic qualities. These include the many colour options, the choice between padded or mesh backs, frame variations with and without armrests, simple interlinking, great flexibility in arrangement and good stackability, together with innovative features such as a digital number display, for example. The Comforto 29 family of chairs offers in addition to chairs for use in lines of seating also a wide variety of office swivel chairs, visitor and discussion chairs, all with a consistent design language.

SUSTAINABILITY:
ALL PRODUCTS FROM HAWORTH
ARE DESIGNED
FOR LONG-TERM USE
AND MEET THE
TOUGHEST STANDARDS
FOR SAFETY
AND QUALITY

Sustainable actions are part of our company culture. That is why we see ourselves as responsible for our products over a lifetime. Beginning with product development and continuing with the optimisation of material use and the manufacturing process, right up to environmentally-friendly and energy-saving packaging and logistics. Beyond that, right up to sustainable and resource-saving revitalisation or recycling.

AT HAWORTH OUR VISION IS TO CREATE BEAUTIFUL, EFFECTIVE AND ADAPTABLE WORKSPACES

Haworth is a global market leader in the design and production of office worlds that can be easily integrated into all organisational environments. Moreover, all our products can be easily adapted to suit the changing work environments in which they are used. This ensures our customers enjoy long-time use of our products and an outstanding return on investment. Through our products, services and knowledge we strive to provide each of our customers with a tailored interior that enhances their business, stirs the spirits of their employees and at the same time sustains our planet. That's what we mean by beautiful, effective and adaptable workspaces.
